

THE FUTURE OF AUTOMOTIVE DESIGN COMPETITION - TERMS OF REFERENCE

1. NAME OF THE COMPETITION

12TH FUTURE OF AUTOMOTIVE DESIGN COMPETITION (12. FADC)

2. ABOUT THE COMPETITION

The “Future of Automotive Design Competition” is a design competition aimed at the automotive industry, organized by “Uludağ Automotive Industry Exporters' Association (OIB)” under the coordination of “Türkiye Exporters' Assembly (TIM)” and with the support of “Republic of Türkiye Ministry of Trade”.

3. OBJECTIVES OF THE COMPETITION

- Establishing an R&D and design culture integrated with technology in Türkiye,
- Accumulating a sufficient knowledge base in R&D and design,
- Enhancing value added in exports,
- Designing component-based innovative products,
- Designing and developing innovative automotive industry oriented software for Türkiye and its region,
- Promoting the cultivation of new designers/entrepreneurs,
- Having Turkish exporters develop unique products for global markets,
- Presenting innovative and/or unique projects in the automotive industry and bringing such projects together with leaders of the industry, students, academics, investors and entrepreneurs.

4. TERMS OF APPLICATION TO THE CONTEST

- The contest is open for the participation of all industry professionals, academics, R&D personnel, technopole workers, designers, entrepreneurs, freelancers and students interested in the industry. All persons over the age of 18 can participate in the contest individually or as a team. In team applications, one person should be identified as the team leader.
- For applying projects, conditions sought are: (i) being innovative within the automotive industry of Türkiye and/or its region; (ii) not being mass produced. In case otherwise is determined, the project shall be disqualified from the competition, and the prize (if awarded) shall be recollected fully in cash by OIB. The competitor who is awarded guarantees to return the prize and the amount received if such circumstance occurs. Moreover, in cases where the project submitted to the competition is found to not be a unique and original piece of work, where a claim to such effect is asserted and where third parties make a claim to the design, the responsibility rests with the competitor.
- There is no limitation on the number of projects to be applied for in the competition. A single competitor may apply with several automotive industry related projects, provided that each project is different. However, within the same competition year, only 1 of such projects may be awarded.
- In team applications, one person should be identified as the team leader/project executive to pursue relations with OIB. Each team member is jointly and severally responsible before OIB. If the applying team member(s) have not received education from any educational establishment, no graduation certificate, diploma or student certificate will be sought, on the condition that a written statement to such effect is presented by the relevant member(s).

- Even if a competitor/entrepreneur/team which was awarded the first prize in two years at a design competition organized by a different **business association*** within the same industry achieves a ranking within the present design competition organized by our Association, the competitor/entrepreneur/team in question will not be awarded once again. If it is confirmed that a prize is awarded, such prize will be retrieved.

***Business association:** This refers to the Türkiye Exporters' Assembly, Union of Chambers and Commodity Exchanges of Türkiye, Foreign Economic Relations Board; exporters' associations; associations, unions and foundations dealing in design; chambers of commerce and/or industry; industrial zones; organized industrial zones; technology development areas; sector associations and establishments; sectoral foreign trade companies; commodity exchanges; employers' unions; and associations, unions and cooperatives established by manufacturers.

5. SCOPE AND THEME OF THE COMPETITION

The competition focuses on sustainable automotive and mobility solutions within the scope of projects which will make a difference at the country-region level in general design, software design and automotive industry, in line with the transformation in automotive industry. The term 'general design' covers matters ranging from holistic, visual vehicle design to the design of systems consisting of vehicles and devices which can communicate with each other, the design of automotive industry components (parts and accessories) and the technical design of infrastructures such as charging and batteries. The term 'software design' signifies the software design generating innovative solutions for mobility issues such as vehicle sharing; connected, autonomous, electric and other alternative fuel vehicles, location-based applications, smart parking applications, smart networks and smart infrastructure applications, digitalization and so forth. On another note, all projects pertaining to various themes ranging from the connection between and across vehicles and smart devices, over-the-air updating of vehicle software, cyber security measures and wearable technologies to renewable and sustainable energy and environmentally friendly approaches, ergonomics and safety et cetera will be explored within the scope of the contest; however, **for 2023, projects involving SUSTAINABLE solutions** will be prioritized. The term 'sustainable solutions' comprises all themes under the United Nations Sustainable Development Goals with due emphasis being placed on issues such as climate-conscious technologies aiming to reduce carbon emissions, electric vehicles, transportation solutions and driving experience technologies.

6. APPLICATION STAGES FOR THE COMPETITION

Application to the competition consists of two stages with the first stage being a declaration-based round of online verification and confirmation of the documents specified here below. At the second stage, the submission of the documents in question will be requested from the finalist project owners for signature and delivery to the Competition Secretariat.

It is obligatory for the following documents which are to be requested during said application stages to be declared and submitted in full and in the requested manner and on the relevant date by the project owner and his/her team to the Competition Secretariat. Otherwise, the applications will not be taken into consideration.

6.1. Online Application and Registration:

Applicants to the competition must fill the online contest application form which is available on the website www.otomotivgelecegi.com . Those who fail to make an online application by the application deadline specified on the aforementioned website will not be admitted to the competition. Any responsibility pertaining to deficiencies in the uploaded files rests with the project executive. OIB may not be held responsible for any service disruption. During the online application stage, the project executive is required to accept the Terms of Reference and the PDPL document over the online application platform.

Due care should be given to abide by the word count limitations specified under the application form and ensure the intelligibility of the text. Project abstracts provided as part of the application form will be printed in a book to be handed out on the day of the event.

During the application, project owners must enter into the system the information requested in full. Any application containing incomplete information will not be taken into consideration.

The projects should not in any way whatsoever display any Personal/Corporate information not belonging to the project owner itself and any Trademark, Logo etc. If a circumstance to the contrary is detected, such projects will be left out of the evaluation.

During project applications, the user will be solely responsible to keep user and project proposal records up to date. In circumstances which may arise out of incomplete or inconsistent registration information, the responsibility rests with the user.

6.2. Pre-Selection:

Online applications will be screened by the pre-selection jury first on paper, then in a face-to-face setting and afterwards in line with the declarations of the lead project officer as to the fulfilment of the conditions set under the competition terms of reference and thereby evaluated. **A maximum of 30 projects** which are found to be eligible to proceed to the next stage will be determined. Selected projects will qualify to be invited before the prize jury to deliver a project presentation.

6.3. Final Selection:

A maximum of 30 projects which pass the pre-selection phase will deliver a project presentation before the prize jury, whereupon **the top 10 projects** deemed to be successful will be determined. Each of the **10 projects** will become eligible to deliver a presentation at the FADC Award Ceremony. The projects in question will be announced on the competition website. **The top 5 projects** which are found to be eligible for the prize will be announced at the Award Ceremony.

The executives of the **10 selected projects** which are found eligible for consideration by the prize jury are obliged to upload to the system the following documents in the requested manner and with the relevant signatures affixed. It is obligatory that said documents are printed out, **signed in wet ink and handwriting on the bottom of each page** and scanned and uploaded in PDF format, with the original copies being submitted within the duration to be specified. **In the case of missing documents, the application will be considered to be invalid.**

Said documents must be drawn up and signed off in line with the definitions provided here below.

THE FUTURE OF AUTOMOTIVE DESIGN COMPETITION UNDERTAKING/APPLICATION FORM

I hereby declare with this document that I have carefully read the terms stipulated in the terms of reference of "Future of Automotive Design Competition" organized on a national scale by the Uludag Automotive Industry Exporters' Association, meet the participation requirements and agree to the terms of competition fully, that the design is original and its intellectual property rights belong to me, that in the event that I rank first in the **12th Future of Automotive Design Competition 2023**, I have not ranked first and received a prize in any category of the design competitions organized by a different association organization active in the same industry within two years prior to this competition, that I will respond regularly for 5 years to the surveys concerning industrial partnership and cooperation which will be conducted by OIB after the event, that the information I provide is true, that I give my consent for my project to be exhibited at domestically and abroad, to be made publicly available for any purpose, to be printed in catalogs, to be distributed, to have poster presentations printed and exhibited, and to have my verbal presentations and project proposals published in a book and will not demand any payment concerning such matters, that I agree to the terms of Annex2. Disclosure/Information Form on Law No. 6698 on the Protection of Personal Data, that the information I have provided in Annex3. Letter of Consent is true, and that I agree to be disqualified in case any contrary circumstances are determined.

The project entitled “.....”
which I have sent to participate in the competition is the final product of my/our team's authentic work, and all legal rights thereof belong to me/our team. On the other hand, I/we hereby agree with this document that I/our team shall bear all responsibilities to arise within the legal framework in the event that an opposite claim arises and third parties claim rights on the design.
